

# WARRIOR EDGE 500 DX

Powerful multi-process pulse welding power source

Warrior Edge 500 DX is an easy-to-use, high-performing and connected multi-process welding machine featuring the WeldModes Pulse, SPEED, THIN CRAFT, ROOT and ROOT PIPE.

- **PULSE** WeldMode – adaptive pulse MIG process optimized to compensate for operator variation with an easy, user-friendly setup designed to achieve excellent weld results
- **SPEED** WeldMode – provides a focused arc that allows the welder to control the weld puddle at higher travel speeds thus increasing the productivity, on steel, stainless steel, and aluminium
- **THIN** WeldMode – reduces spatter levels and helps reduce distortion when welding thin plates
- **CRAFT** WeldMode – double pulse weld process designed to enhance aluminium and stainless-steel, producing TIG like bead appearance with the productivity of MIG welding
- **ROOT and ROOT Pipe** WeldModes – easy to control gap bridging ability, optimized for root pass welding
- **Push Pull Compatible** – capability added to ensure the system is plug and play ready with the water-cooled Push Pull 350
- **WeldCloud** – integrated connectivity

## RobustFeed Edge features

- **TrueFlow** – digital gas flow control system from ESAB, effectively manages shielding gas, both in starts and while welding thus improving quality and decreasing consumption
- **Hybrid HMI** – material selection and configurations on a TFT screen inside the unit with a clear and easy to use external display for everyday operation makes unit intuitive to operate
- **Operator Management** – quick to set-up system with RFID key card that allows locking down quick-jobs with limit setting that improves repeatability and adherence to welding procedure specifications
- **SpoolSafe** – unique in the market, IP54 protection against dust, dirt, and other debris that keeps your wire dry and clean, improves feedability and reduces risk of contaminations of the weld
- Integrates with the Exeor DX torch models graphic display remote without the need for additional connectors
- **Red Dot design award 2021** – winning design provides well-designed ergonomics and intuitive user interface that reduces operator training needs
